

How-To: Print from Your Mobile Phone

You have a huge collection of documents, photos, and emails on your mobile phone. But there is no easy way built into your phone to print any of it. ActivePrint Traveler gives you the ability to print from your phone no matter where you are.

What Can I Print?

Depending on what kind of phone you have, ActivePrint Traveler gives you the ability to print the following documents and information:

- Photos and images (including integration with the camera built into your phone)
- Office Documents (including Microsoft Office 2000 and 2007 compatible, including Word, Excel, and PowerPoint)
- Plain Text
- Web Pages
- Contacts from your phone's address book

What Do I Need?

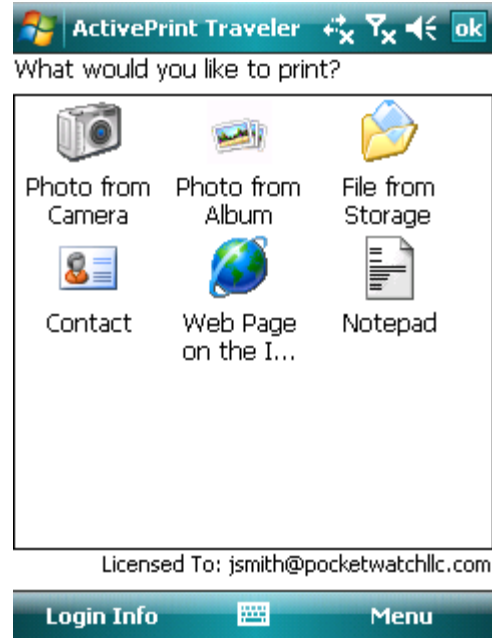

ActivePrint Traveler requires very little to print.

- A mobile phone with the appropriate version of ActivePrint Traveler installed (available at <http://www.ActivePrintTraveler.com>)
- A data connection for your phone either through your cellular carrier or through a WiFi connection
- A USB Flash Drive with the ActivePrint Traveler Helper App installed (available at <http://www.ActivePrintTraveler.com>)
- An ActivePrint Traveler account which you can register for free for at <http://register.ActivePrintTraveler.net>

How Do I Print?

Printing with ActivePrint Traveler is very simple. Simply follow the steps below.

1. Launch the ActivePrint Traveler app on your phone
2. Choose what you want to print ("Photo from Album" for example)
3. Set the options for how you want your document to be printed which including number of copies and portrait/landscape paper orientation
4. Choose "Send"

- If it is your first time to ActivePrint Traveler on your phone you will be asked for your login information which you entered at the ActivePrint Traveler Account registration page at <http://register.ActivePrintTraveler.net>.
5. Then go to your nearest Windows XP/Vista PC and run the ActivePrint Helper App from your USB Flash Drive (available at <http://www.ActivePrintTraveler.com>)
 - This PC can be your office computer, a computer at the hotel you're staying at, or a computer in an open access lab at your school.
 6. Click the button labeled "Print..."

All your documents will then be automatically downloaded and printed to the PC's printer.

Is It Secure?

Yes. ActivePrint Traveler uses 128 bit data encryption to make sure that your documents are safe when traveling between your phone, your account, and the ActivePrint Traveler Helper app.

What Phones Are Supported?

Currently we support Windows Mobile phones. Support will be added for Apple iPhone next, with RIM Blackberry and Google Android soon to follow. We plan to finish production on the iPhone version within a couple of months (March 2009).

How Much Does ActivePrint Traveler Cost?

ActivePrint Traveler only costs \$3.99 per phone. This price is the same on all types of phones that ActivePrint Traveler supports.
